Objectives

As an aspiring and motivated Information Technology student at Polytechnic University of the Philippines - Quezon City Campus, looking for an internship opportunity where I can apply what I've learned and gain real-world experience. I'm passionate about web development and software development, especially on front-end development and the design aspects of building applications and websites. I'm eager to work with professionals, learn new skills, and improve my problem-solving abilities. More than just building my technical expertise, I want to understand how things work in a real work environment and contribute to meaningful projects while growing as a future IT professional.

Educational Background

| | |
|--|----------------------|
| Primary: Holy Name of Mary School | 2009-2015 |
| Secondary: Holy Name of Mary School | 2015-2019 |
| Nuestra Señora De Guia Academy of Marikina | 2020-2021 |
| Tertiary: Polytechnic University of the Philippines, Quezon City Campus | (2021: October 2025) |
| Bachelor of Science in Information Technology | |

Skills

Programming Language: Familiar with Python, C++, HTML, CSS, and JavaScript from using them in different projects and tasks.

Frameworks/Tools: Experienced with FlutterFlow and Flask, which I've used in various projects to build and manage applications.

UI/UX: Skilled in using Canva and Figma for designing interfaces before moving into the coding phase, ensuring a strong visual foundation for development projects.

Office Proficiency: Proficient with Microsoft Office tools like Word, Excel, and PowerPoint, which I use regularly to manage documents, data, and presentations efficiently.

Editing: Have knowledge of Adobe Photoshop, Adobe Lightroom, and Filmora, which I've used for creating and editing visuals in different projects.

Soft Skills: Able to manage projects efficiently, communicate clearly, and collaborate effectively with teams in both academic and project settings.

Academic Projects

Rental House System — Contributed to developing a Rental House Management System in our Database subject, focusing on front-end development for managing tenant details, leases, and payments.

Student Grade Management — Contributed to developing a Student Grade Management System, focusing on front-end design for grade tracking and reporting.

Motivational Quote Application — Developed my own Motivational Quote Application using FlutterFlow, featuring daily inspiring quotes and an interactive, user-friendly interface.

Finance Management System — Part of the team that developed a Patient Management System, where I contributed as a Front-End Developer and Document Analyst, focusing on the Finance Management System module.

Certifications

mabl Skills Certification/advanced — Completed the mabl Skills Certification course, gaining hands-on experience in automated testing and quality assurance using Mabl's testing platform.

Fortinet Certified Fundamentals in Cybersecurity — Completed the Fortinet Certified Fundamentals in Cybersecurity, covering essential concepts of cybersecurity, including threat analysis and protection strategies.
